The successfully design & developed on Health Guard

Received By

ACKNOWLEDGMENT

Acknowledgment is more than just a formality; it is a genuine opportunity to appreciate and recognize those individuals whose active support made this project possible. We are deeply grateful to Almighty Allah for His grace and mercy, which provided us with the strength, good sense, and confidence to successfully complete the project.

Presenting "Health Guard" in your hands, we have diligently considered all relevant and crucial topics to make this project more effective and present a better outlook. The development of this project involved the utilization of various technologies, including HTML, CSS, JS, jQuery, Bootstrap, MySQL, and PHP.

We would like to acknowledge everyone who provided moral support and assistance, contributing to the success of this project. A special note of appreciation goes to "Sir Talha" for his valuable guidance and unwavering support throughout the completion of this project.

Project Synopsis

- Background:

Health Guard is a Children vaccination website that deals with all types of Vaccinations. A children vaccination website provides information and resources for parents and caregivers to help them make informed decisions about vaccinating their children. The website typically includes information on the importance of vaccination, the recommended vaccination schedule, the risks and benefits of each vaccine, and any potential side effects. It may also offer resources for finding vaccine clinics, answering common questions and concerns, and tracking vaccination records. The goal of a children vaccination website is to provide accurate and up-to-date information to help ensure that children receive the vaccines they need to protect against serious and potentially life- threatening diseases.

Problem Definition:

The Children Vaccination Real World Challenges:

One of the main challenges facing a children vaccination website in the real world is the issue of vaccine hesitancy among some parents and caregivers. Some people may be hesitant to vaccinate their children due to concerns about vaccine safety, misinformation, or mistrust of the healthcare system. To address this issue, our website can provide accurate and trustworthy information, address common concerns and emphasize the importance of vaccination for children's health. The website can also partner with healthcare providers, community organizations, and social media platforms to increase outreach and education efforts. Additionally, providing easy access to vaccine clinics and resources can help make the vaccination process more convenient and accessible for families.

Requirement Specification:

Admin

- ☐ All patient details
 - o View all patient profile details
- ☐ Report of COVID – 19
 - o patient, COVID – 19 test report(Date wise report)
 - o Admin can export the details in xls format by date , week and month wise report
- ☐ List of vaccine
 - o available or unavailable
 - o Admin can view the availability of the vaccination
- ☐ Approve Hospital Login
 - o Approve or Reject
 - o Once the request for appointment from patient side, it will be approved from the admin
- ☐ List of hospitals
 - o Admin can view the hospital details

□ Booking Details

- o Admin can view the booking details from patient side for booking COVID– 19 test results

Hospital

□ Register & Login

- o Can register and login into the app with hospital name, address and location details.

□ List of patient details

- o Hospitals can be view the patient details who are all approve for COVID – 19 tests.

□ Request from patient

- o Hospitals can be request to the patient from the hospital side who are all approved/rejected for covid – 19 test /vaccination.

□ Update covid – 19 result

- o Hospitals will be updated the patient's covid – 19 results.

□ Update vaccination status

- o Hospitals will be updated the patient's vaccination status.

Patient

□ Register & Login

- o Patient can register and login into the app with patient name, address and location details.

□ Search covid-19 / vaccination hospital

- o Patient Can search the covid-19 hospitals and get from the vaccination hospitals

□ Request for covid-19 test / vaccination hospital

- o A Patient Can request to the hospital for the covid-19 test. It will approve patient can take vaccination from the hospitals

□ Report of covid test/Vaccination taken

- o A Patient can take the covid-19 test result report and their suggestion vaccination.

□ Book Hospital appointment

- o A Patient will booking the appointment from the hospitals and tested the covid-19 tests.

□ My Appointment

- o A Patient will check the appointment timing and hospital details from the Appointment.

□ View Results

- o A Patient can view their covid-19 test results and vaccination suggestions also.

□ My profile

- o A patient will check the profile details and also edit or delete the other information also.

YOUR HEALTH, OUR PRIORITY

Empowering Wellness for Everyone

Discover convenient COVID testing and vaccination solutions tailored for your community.
